HORSE ARENAS

Worldwide Steel Buildings has supplied riding arenas for 25+ years for multiple uses from riding lessons, horse shows, training facilities, and competition.

We understand the value of your stock so we manufacture the strongest buildings available. Some riding arenas also have living quarters tied to them and since we put our secondary framing on two foot centers for strength they

also allow you to finish off living quarters without the need to build additional stud walls. Need a second floor to store those extras that seem to get in the way? Not a problem, with a Worldwide buildings system second floors are easy and very cost effective. Our standard truss spacing also makes adding stalls a breeze. We have supplied arenas and barns to some of the top stables in the county, so when you want to protect what matters trust Worldwide Steel Buildings with your building needs.
