## GARAGES AND SHOPS

*Build the Steel Garage Of Your Dreams  
and protect what matters.*

Our steel truss construction provides the strength and durability to protect your vehicles, bikes, workshop, toys, recreational equipment — or any of your other prized possessions. The versatile building designs allow you to customize and finish off your building to your desired specifications.

But the quick (can be erected 3 to 5X faster than conventional construction), easy (pre-engineered for simplicity) and economical (most buildings don't require rental of heavy equipment) assembly is what customers love the most. Our DIY designs make it easy whether doing it yourself or hiring outside help. With a 50 year structural warranty and the strength to stand up against what mother nature throws at it, you will have peace of mind knowing you built the best building available.
